E. SESSION SUMMARY:

The target contained hard rock, water, altered or shaped rock and a sense of a large, extensive emptiness. There was an extreme, incredible hollowness; a nothingness which extended above and to the sides. Surrounded by emptiness, a dark emptiness.

There was a feeling of natural forces beneath me; an expanse of raw natural processes or forces; primal energies; an upthrusting of material. There were obvious cracks with a flowing associated with them. There was a sense of height; of standing on the edge of hard land and overlooking the scene described above. An outstanding feeling.

A section of the target has a pathway with steps, handles to hold on to and something hanging down reminiscent of a rope or cable. There was an object associated with the concept of something being scooped up. There was also the concept of a channeled or directed movement of a material which felt partially liquid.
